[science](#), [space](#), [florida](#), [geology](#), [diamonds](#), [astrophysics](#), [black-diamonds](#), [carbonado](#)
 Seeded by [Jack Huang](#)

If indeed "a diamond is forever," the most primitive origins of Earth's so-called black diamonds were in deep, universal time, geologists have discovered. Black diamonds came from none other than interstellar space.

In a paper published online on December 20, 2006, in the journal *Astrophysical Journal Letters*, scientists Jozsef Garai and Stephen Haggerty of Florida International University, along with Case Western Reserve University researchers Sandeep Rekhi and Mark Chance, claim an extraterrestrial origin for the
